Mobile Developer Test (iOS/Android)

Test Duration : 3 hours

Goals :
1. Create an app that connects to JSON API, parses and display the data. (List of News is a Scrolling List).
   a. Use "NewsItemId" for News headline.
   b. Use "Image/Thumb" value for thumnail image
   c. If "DateLine" value is less than 1 hour, use "ByLine" – "DateLine" value
2. Add Offline functionality (Image caching, news caching in DB/Local). If network is not available, images & news should be loaded from persistance.
3. For iOS – use of Autoloayout is suggested.

iOS verson > 7.0
Android > 4.0

iOS Devlopers : Please send the complete project code in **zip** format.
Android Developers: Please send the complete code in **zip** format with the **apk**.

API : https://api.myjson.com/bins/46jjg

Look an feel for individual cell or view:

When image is available & "DateLine" key value (i.e is time) is greater than one hour.

When image is available & "DateLine" key value (i.e is time) is less than one hour.

When image is not available.
